Summary

Computer Science undergraduate with a strong foundation in Data Structures, Algorithms, and Object-Oriented Programming, and hands-on experience building full-stack and backend applications using Java, Spring Boot, JavaScript, React, Node.js, Express.js, PostgreSQL, and REST APIs. Seeking Software, Product, and Full-Stack Development roles where I can apply my strengths in backend engineering, REST API design, and problem solving to build scalable, secure, and reliable systems that make a real impact.

Education

B. Tech in Computer Science & Engineering, Vasireddy Venkatadri Institute of Technology, Guntur
2023 – 2027, Percentage – 83% (to date)

Pre University Course, RGUKT - AP, RK Valley
2021 – 2023, CGPA - 9.15

Board of Secondary Education, Narayana E.M High School, Guntur
2020 – 2021, Percentage – 99%

Technical Skills

Languages: Java, Python, JavaScript, SQL
Backend: Spring Boot, Node.js, Express.js, JPA/Hibernate, RESTful APIs, JWT Authentication, RBAC
Databases: PostgreSQL, MongoDB, Prisma ORM
Testing: Jest, Supertest, Postman
Tools & DevOps: Git, GitHub, Docker, Linux, VS Code, Render
Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems, DBMS, Computer Networks, REST API Design

Projects

Smart Faculty Leave & Substitution Management System | GitHub
React.js | Node.js | Express.js | MongoDB | JWT | REST APIs | GitHub

- Developed a full-stack faculty leave and substitution app using the MERN stack, with JWT authentication and separate access levels for Faculty, HOD, DEO, and Admin users.
- Implemented 15+ RESTful APIs covering leave requests, approvals, substitution assignments, timetables, user administration, and credential handling.
- Wrote a substitution engine that checks timetable conflicts, leave schedules, and slot availability to recommend eligible faculty on its own.
- Connected the leave approval flow to substitution updates and schedule changes in real time, with React dashboards showing 4 user roles - Faculty, HOD, DEO, and Admin users only what they need.

TickerWise - Equity Research Workbench for NSE Stocks | GitHub
Python | FastAPI | MySQL | SQLAlchemy | React | TypeScript | GitHub

- Built a local-first workbench for Indian equities that stores 2,600+ NSE companies and daily end-of-day price snapshots, with a FastAPI REST backend and a React + TypeScript interface for fast stock search.
- Wrote an idempotent daily ingestion pipeline with retry backoff, coverage checks, and per-run audit counters for records read, inserted, updated, skipped, and failed.
- Managed the MySQL schema with SQLAlchemy models and Alembic migrations, and covered the backend and frontend with unit and integration tests.

Certifications

- Programming with Java – NPTEL, IIT Kharagpur
- AWS Cloud Foundations - AWS
- Competitive Programming – NPTEL, IIT Gandhinagar
- Fortinet Certified Fundamentals in Cybersecurity – Fortinet Training Institute (June 2026 – June 2028)

Achievements

- Secured the Consolation Prize at the Nexora Full Stack Expo, organized by the IEEE Student Branch of VVIT, for developing the Smart Faculty Leave & Substitution Management System as part of a team.
- Actively solving Data Structures and Algorithms problems on LeetCode to strengthen problem-solving skills.
